

## 1906 Topographic Map, BASF NW

- BASH NW, prior to shoreline hardening, wall construction and wetland filling (wall plans were dated 1909).
- Two channels observed
  - One heading west from the Detroit River
    - This is approximately the location of the 12-foot void in the wall noted by divers in 2016.
  - One in a peanut-shaped loop through the wetland area.
